# WAEL HASAN

## Senior Full-Stack JS/TS Software Engineer (MERN stack)

### CONTACT

whma87@gmail.com

0021040204421

https://waelhasan.vercel.app/

Aswan, Egypt

### EDUCATION

**BACHELOR OF ENGINEERING**

*2010*

Aswan university, Faculty of engineering

### INTERESTS

Programming
Reading
Blogging

### SUMMARY

Experienced web developer with +9 years of experience, specializing in the MERN stack. Enthusiastic about testing, skilled in a wide range of technologies including Node.js, React.js, GraphQL, and proficient in tools like Docker, Redis, and Jest. Known for teamwork, leadership, problem-solving, and a commitment to continuous learning, with a strong focus on pragmatic solutions and collaboration.

### HONORS AND AWARDS

Won a scholarship at QCRI (Qatar Computing Research Institute).

### EXPERIENCE

#### A FREELANCER FULL-STACK MERN DEVELOPER

**SELF EMPLOYED** (Remotely from Egypt) | **September 2024 - Now**

Architect, document, develop and maintain web applications and APIs.

#### SENIOR BACKEND MERN DEVELOPER

**Unifi Solutions** (Remotely from Egypt) | **January 2024 - September 2024**

- IoT Platform Development: Participated in the design and implementation of a scalable IoT platform using a microservices architecture with Apache Kafka, Redis, and Kubernetes.
- Solution Implementation: Involved in the deployment of innovative software solutions, enhancing system performance and security for top-tier clients.
- Technology Integration: Integrated advanced technologies and intuitive interfaces to deliver high-quality, user-centric software products.

#### SENIOR FULL-STACK JS/TS SOFTWARE ENGINEER

**ANDELA** (Remotely from Egypt) | **November 2019 - August 2022**

Worked as a contractor SSE with Andela Inc, which outsourced me to work with Understood for All Inc (remotely). I developed, maintained, tested, and documented multiple Front-end(s) and back-end(s), using technologies such as: JS, TS, Nodejs, Reactjs, Nextjs, Graphql, Contentful, ...etc.

#### SENIOR FULL-STACK JAVASCRIPT SOFTWARE ENGINEER

**INDEX GROUP** (Onsite in Ismaeileia, Egypt) | **October 2018 – October 2019**

Worked for Index Group mainly as a Back-end senior developer.

#### A FREELANCER MERN FULL-STACK DEVELOPER

**SELF EMPLOYED** (Remotely from Egypt) | **February 2018 - October 2018**

Architected, documented, developed and maintained web applications and APIs.

### SENIOR FULL-STACK JAVASCRIPT SOFTWARE ENGINEER

**ASMA SYSTEMS** (Onsite in Riyadh, KSA) | **January 2015 – February 2018**

Build user interfaces, web services, data layers ... etc, in JavaScript language. By using:
- Node js (Sequelize, Mocha and Chai ... etc) on the back end
- Express js and handlebars, Ext js, or React js on the front end.
- MongeDB as a database

Also using .NET framework and MS sql server and other technologies when needed.
you will find the technologies I used in this job in the projects I worked on until now.

### JAVA EE DEVELOPER

**TRUMEGA TECHNOLOGY SOLUTIONS** (Onsite in Cairo, Egypt) | **August 2014 – December 2014**

Develop and maintain java EE projects, using jsf, primefaces, EJBs ... etc.

### A FREELANCER DEVELOPER

**SELF EMPLOYED** (Remotely from Egypt) | **September 2011 - August 2014**

Develop and maintain different types of software systems.

### RESEARCH ASSISTANT

**C.A.I.R.O (Center for Artificial Intelligence and Robotics), at faculty of sciences at aswan university | September 2010 – November 2011**

Image processing development using C++ and OpenCV.

## STUDY

### ASWAN FACULTY OF ENGINEERING AND TECHNOLOGY

**Bachelor's Degree | 2005 - 2010**

Electrical department, Computer and systems branch
Graduation year: 2010
Graduation project: “game development using C# and XNA library”.
Grade of graduation project: excellent
Total grade: good (73.18%)

## MAIN DEVELOPMENT SKILLS

HTML5 CSS3 JAVASCRIPT(ES6+) TYPESCRIPT NODEJS

GRAPHQL EXPRESSJS NESTJS REACTJS (+REDUX) GIT+GITHUB

MONGODB+MONGOOSE ODM JEST RESTFUL WEB SERVICES

CONTENTFUL CYPRESS NEXTJS SQL+SEQUELIZE ORM

LINUX+BASH DESIGN PATTERNS+BEST PRACTICES AJV

MOCHA+CHAI+ENZYME+SINON+NOCK+REWIRE SASS

GULPJS GRPC SOCKET.IO DEEPSTREAM REDIS

## MAIN PROJECTS AND CONTRIBUTIONS

### GRAPHQL LAYER

**Understood for All | 2021 - 2022**

Created and maintained a Graphql Backend layer. It is an intermediate layer, that allows different Front-ends (Web and Mobile) to call a single Back-end layer, which in turn takes care of calling individual specialized RESTful Back-end services, and other third party services.

Technologies used: Javascript, Nodejs, Graphql, Contentful, Redis, Jest.
- Role: Back-end developer

### COMMUNITY ADMIN

**Understood for All | 2021 - 2022**

An internal Nextjs Front-end for administration tasks related to Wunder App community.

Technologies used: Typescript, React js, Contentful, Graphql, Cypress.
- Role: Front-end developer

### CONTENTFUL-CHAMELEON

**Understood for All | 2020**

An internal Nodejs package for mocking Contentful's RESTful/Graphql APIs. Used in e2e tests of other projects.

Technologies used: Javascript, Typescript, React js, Contentful, Graphql, Jest.
- Role: Back-end developer

### CAMGEN

**Understood for All | 2020**

An internal yeoman generator for creating new web Front-ends that depends on a specific Contentful structure, and creates that structure on Contentful on behalf of the user.

Technologies used: Javascript, Yeoman, Contentful, Jest.

### MOSAIC

**Understood for All | 2019**

An internal Contentful App which allows content creators to add data that belongs to dynamic content types.

Technologies used: Typescript, React js, Contentful, Graphql, Jest.
- Role: Front-end developer

## A HOME SERVICES APP

**Index Group | During 2019**

Participated in back-end development

Technologies used: javascript, Node js, Express js, Mongodb, Mongoose, grpc, deepstream
- Role: Back-end developer

## A FOOD SERVICES APP

**Index Group | During 2019**

Participated in back-end development

Technologies used: javascript, Node js, Express js, Mongodb, Mongoose, grpc, deepstream
- Role: Back-end developer

## 'SEKKAH' SYSTEM

**Freelancing | During 2018**

- Designed the architecture of 'sekkah' system
- Implemented back-end services, which consists of:
  - RESTful web services
  - Real-time communications
- Built a small admin dashboard

Technologies used: javascript, Node js, Express js, Socket.io, Mongodb, Mongoose, React js, Redux, HTML 5, CSS3
- Role: Mixed (Architect + Full-Stack developer)

## DIRECTED INSPECTION

**ASMA SYSTEMS. | February 2015 – Mars 2017**

A big project for the ministry of labor, inspection department. In which we developed several subsystems to automate, guide, and increase the productivity of inspection department.

Technologies used: ASP.NET, EXT.NET, javascript, t-sql, MS sql server, C#, visual studio
- Role: Mixed (Maintainer + Main developer)

## CONTRIBUTING IN DEPLOYING A FAULT TRACK SYSTEM

**ASMA SYSTEMS. | February 2015 – April 2015**

- Contributed in deploying a system that is dedicated for handling un-manned remote sites in the desert, for a telecom company in Saudi Arabia.
The system consists of a software solution that runs on a windows 2003 server (legacy dependencies), and because the hardware is new and isn't compatible with that version we used Ubuntu and installed windows server in a virtual machine using virtualbox.
- Technologies used in the deploying process: virtualBox, CloneZilla, Ubuntu, shell scripting, batch files.

## LOSSPREVENTION SYSTEM

**TRUEMEGA TECHNOLOGY SOLUTIONS | August 2014 to November 2014**

- LossPrevention System is an internal java EE based web application, made specifically
for Vodafone Egypt. that is mainly built for tracking items that was lost by Vodafone employees, and take actions according to the item type and company policy (like sending mails with different templates, and generating statistics about found items .. etc).
My work was building a new version of the application that gives it new abilities, plus finding and fixing bugs in the code that was written by the previous developer.
- Technologies used In this project: Oracle DB, primefaces 4.0, JPA, EJB 3.0.
- Role: Maintainer

## CONTRIBUTING TO BUILDING A FACE DETECTION AND RECOGNITION SYSTEM

**C.A.I.R.O center | October 2010 to September 2011**

- I was an assistant researcher in C.A.I.R.O research center, and my main responsibility was helping in building a software system that can detect and recognize human faces. we used C++ and OpenCV as tools.
- Role: Maintainer in some areas + Main developer in other areas

## DEVELOPING A 3D GAME USING C# AND XNA

**Aswan faculty of engineering | During 2010**

- That was my graduation's project, and in it we developed a relatively small 3D arcade game using C# and XNA library.
- Role: Main developer
